This is one of the three cars Miller's has been taking care for me. Simplify another exceptional service experience. They did the diagnosis on my car and referred me to the dealer for a hidden extended Warrentee. They even did the service for me for free. Their findings matched exactly what the dealer discovered. I could have easily spent a lots of \$\$\$ before the real underlying problem was discovered. Thank you Miller's for your expertise and outstanding service. You are not an alternative of my desires but my dealers

Excellent customer service along with honesty, kindness, and generosity is an extremely rare experience to have here in SoCal. I took my car in due to the check engine light coming on, it had a bunch of issues. After they checked it and fixed most of it, it still had a few other things that needed to be fixed. So they called me and offered me a car to use for the weekend so they could work on my car for longer. They ended up fixing the remaining issues free of charge. The whole transaction was free of complications on my side and I was extremely impressed with how well I was taken care of. They give rides home and pick ups as well! Who does that?! I am an absolute lifetime customer. Wonderful people, honest reliable service.

I have been taking my car to Millers for 20 years. Several years ago ,when the other facility had burned, I took it to an other garage. I spent 6000,00 dollars trying to get it

fixed. Millers reopened so I took it back to them, they had put in all the wrong parts. Thanks to Milers I have had no more problems. Wendy and the guys are wonderful, I well all of my friends and family about Millers Automotive.

Our family always goes to Miller's Automotive for all required maintenance work and repairs. They are one of the few certified automotive maintenance/repair facilities that use (where possible), auto manufacturer's suggested after-market parts. I know because I always check the parts they have replaced on my Toyota vehicles. They could cut costs by using cheaper after-market parts but such parts do not last long. I've experienced this in cheaper brake pads, replacement parts from another auto maintenance/repair shop (whose name I probably cannot legally say here).

2. Wendy is down-to-earth. 3. Most accommodating. 4. Very clear communication.
During my three trips for repairs: 1. Helped to clarify when I said "I hear funny noises"
6. Identified the problems 7. Told me what I could safely put off, since the repairs
were costly 2. Repaired the car exactly on the time and cost schedule given 3.
Provided a written record of repairs and suggested future maintenance or repairs

All visits are friendly and beneficial to our two old cars, and to me. The most recent visit was for a starting problem. On a Sunday morning the car would not start. The next day the car did start so I could drive it to Miller's. They kept it all day and started it periodically. Evidently, it was a transient problem, a "hiccup." Some shops might have "manufactured" a problem to solve, and charge me for it. Not Miller's. At the end of the day I picked up the car. No charge. That's the kind of honesty I really appreciate!

Thorough checkup and diagnosis of my 1984 Toyota pickup truck. Eric the manager got back to me with the results of their inspection by late morning that same day. Parts had to be ordered but the truck was ready to go by the next day. Eric called me

early enough for me to pick up the truck before they closed. Truck runs great and I'm back to work with very little lag time. Thank you Miller's Automotive!

Old car needed air conditioning repair. Eric and the mechanics assessed what needed to be done and suggested options. The work was accomplished with professionalism. It was pricey, but the guarantee, and the cool car, make it worthwhile. Eric and Wendy are always helpful and friendly and a pleasure to do business with.

Went in for a 135,000 mile maintenance work on my 2004 RAV4. Eric and his team of mechanics discovered oil leaks in my oil pan and transmission pan before they became major problem issues. Their thorough checkup of my work vehicle and repair work were completed in one day. I was back to work and on the road again in no time. I would recommend them for their excellent service and workmanship.

Even though we no longer live in Fullerton, it is worth using Miller's Automotive because we can depend on them for quality service. They even take care of the little things, for example, they even took my car in for a wash in addition to the mechanical work. They seem to try to find the most reasonable solution for car repair, and give you options.

I have always been a "take it to the dealer" person while my husband likes to patronize a local mechanic. I agreed to go to a local mechanic and went to Miller's automotive. Several of my colleagues at work take their brand new and older cars to Miller's. All of them had raving reviews... and I have to agree. They provided great service at a great price. The cost of my oil change, lube and filters was way below the dealer and competitive with large chain oil change places. What really sold me was the diagnostic on my car (2002 Chrysler that is new to us) and the replacement of the purge control solenoid valve. This was much cheaper than I ever imagined. I will NEVER go back to the dealer. Miller's will service both of our cars from now on. I have even passed out their business card to my family members.

I brought my Volvo xc90 in at 1:00pm for computer diagnostic. I was told that it would be an overnight diagnostic and repair. I rented a car for the day and the next day. I called Miller's back to see if my car was ready and I was told that they didn't have the right machine to run the diagnostic!!!! I wasted time and money on a rental vehicle. Had they taken the time to look at my car before the day ended, they could have told me to come back and get my car. Or if they couldn't take a look at it that same day, suggest for me to bring my car back in the next day. On top of it all, they told me that the "diagnostic warning light" was not urgent. Thumbs way down for making me wait for my car and wasting my time and money. I won't go back, I will go back to the dealer who gives me a free rental car, a beautiful clean waiting area, free coffee and donuts, and a kids area for my child to play in.

First time here with two old Toyotas for routine oil changes. Old garage closed. Needed to find new place to take vehicles for all maintenance care. Service bays clean, personnel efficient and friendly, good work done on schedule, prices fair, paperwork and estimates written in plain english. What's not to like? Glad businesses like this still exist. Looks like my two old cars have found a home.

Miller's Automotive is the best Automotive shop in Orange County. The location is always clean and inviting. The employees are friendly, courteous, kind, and are super awesome people. Being a customer I felt welcomed, that my business was appreciated, and that the employees at Miller's Automotive understood my needs. As a customer who isn't well versed in automotive services, I felt very informed about what kind of work they needed to do and why. I felt that the prices were fair and I was not being ripped off. Miller's made my experiences quick and simple and treated me with the respect any customer would want. Miller's Automotive has changed the way I feel about auto repair shops.

Honestly, I was preparing for the worst cuz my car does have over 217,000 miles on it and I thought "ooo boy! here we go...the gently let her down speech that it's time to put Bessie out of her misery". Amazingly enough, after all was said and done, and in a most timely manner...everything, which it turns out was just a clogged fuel injector, came out to under \$100! I was floored! And grateful! I needed a rebuilt transmission for my 99 Toyota Camry. Miller Automotive did not believe me, and kept the car for the weekend before telling me it needed the transmission rebuilt on Monday. They completed the work fast and we picked the car on Thursday -- but it is not right. The car jerks when going into reverse, and clunks when shifting into 4th. Before picking up the car, the service writer told me he drove it and it shifts fine. This was an expensive repair that was not done correctly.
